

ABENANTHAN P

Aspiring Software And Cloud Engineer

+91 9940867949 • abenanthan.72007@gmail.com •  github.com/Abenanthan •  abenanthan-p-561485318

EXECUTIVE SUMMARY

Motivated Computer Science and Engineering student with a strong foundation in programming and software development. Proficient in Python, Java and basic web technologies, with hands-on experience developing academic projects and implementing algorithms. Familiar with Linux environments and database concepts and cloud computing fundamentals through AWS Academy cloud architect training. Possesses strong problem-solving and analytical skills with a keen interest in software development. Eager to apply technical knowledge to real-world projects while gaining practical industry experience through an internship opportunity.

EDUCATION

B.E COMPUTER SCIENCE AND ENGINEERING

2024-2028

Rajalakshmi Engineering College

TECHNICAL SKILLS

- **Programming Languages :** Python , Java , C and Basic Machine Learning Models
- **Database Technologies :** MySQL , Oracle Database , MongoDB, PostgreSQL
- **UI/UX Design:** User Interface Design, Wireframing, Prototyping
- **Tools and Software:** Linux OS , Docker , Github , Figma , Canva
- **Systems and Security :** Linux Administration , Bash and Shell Scripting , Basic Networking and Cybersecurity Concepts

SOFT SKILLS

- Communication & Teamwork
- Problem Solving
- Time Management
- Multilingual Abilities : Hindi (Elementary Level) , Tamil (Native)

PROJECTS

• VibeUp - Music Streaming App

A fully-featured Android music streaming app that streams Tamil, Telugu, and Hindi music via JioSaavn API with Firebase authentication, playlist management, and real-time media controls including lock screen and notification support.

Technologies Used : Kotlin • Jetpack Compose • Firebase Auth & Firestore • ExoPlayer/Media3

• Urban Road Inspector — Deep Learning Pipeline

A 3-stage deep learning pipeline built to detect and classify road surface damage, progressing from binary classification to 4-class damage type recognition and real-time bounding box localization using YOLOv8s

Technologies Used : Python • PyTorch • ResNet-50 • YOLOv8s • Torchvision Model

- **BitVerity – AI Monitored Coding Platform with Code Authenticity Detection**

A full-stack competitive programming platform integrated with a real-time, multi-model ML pipeline to detect and analyze AI-generated code submissions based on behavioral analysis with live leaderboards, and Gemini-powered explainability reports

Technologies Used : PostgreSQL (Prisma) • Redis • Socket.io • Docker • Monaco Editor • XGBoost • Scikit-learn (Isolation Forest) • PyTorch (CodeBERT & UniXcoder)

- **ToxiShield – Cyberbullying Detection Model**

Deep learning-based content moderation system using Bidirectional LSTM that automatically detects 6 types of toxic content in online comments with 97% accuracy. Features real-time predictions, batch processing, and intuitive Gradio interface for social media platforms and online communities.

Technologies Used : Python • TensorFlow • LSTM • NLP • Gradio • Keras • Binary Classification • TextVectorization

EXPERIENCE

IoT Intern – National Small Industries Corporation Technical Services Centre, Chennai

Dec 2025

Led the development of a Raspberry Pi-Based Traffic Congestion Analytics System by developing Python-based modules for traffic data simulation, congestion analysis, and edge-level processing, while integrating the solution with the ThingSpeak IoT Cloud Platform using REST APIs for real-time visualization and analytics.

AI Intern – KuttyKoncepts, Rajalakshmi Engineering College

2026–Present

Selected through a competitive internship program after securing 1st Place to contribute to institution-scale AI initiatives. Worked on AI-based academic content and animated educational video generation, AI voiceover and editing workflows, Moodle-based learning platform development, video platform integration, and smart digital learning experience design.

Design Team Member – CyberSentinels Club, Rajalakshmi Engineering College

2025 – Present

Contributed to the design and branding efforts of CyberSentinels Club by creating posters, presentations, and digital content for technical events and workshops. Collaborated with team members to develop visually engaging and user-friendly designs that enhanced event outreach and participant engagement. Supported the club's promotional initiatives through creative design solutions and effective visual communication.

CERTIFICATES AND ACHIEVEMENTS

AWS Academy Graduate : Cloud Architecting (60 Hours) – AWS Academy

Exploratory Data Analysis with Python and Pandas : Coursera Project Network

- Secured 1st Place in a Design Thinking And Innovation Contest and has been awarded Innovative Project Of the year by Institution Innovation Council demonstrating creativity, innovation, and problem-solving skills.
- Secured 1st Place in the KuttyKoncepts Internship at Rajalakshmi Engineering College, earning the opportunity to contribute to AI-powered academic content generation, animated educational video creation, Moodle-based learning platform development, and next-generation digital education initiatives.
- Selected as a Finalist in a National Level Hackathon in association with RACE , IETE-SF and ECEA held at Sri Venkateswara College Of Engineering by presenting a AI Powered Product Recommendation System designed to deliver personalized recommendations based on user preferences.
